Hygienic

Plastic pallets are non-porous and resistant to moisture, insects, fungi, acids, fats, solvents and odor. Our pallets are inspected after every turn to make sure they meet our quality standards.

Sustainable

Ultra-durable pallets can be reused for years and outlast wood alternatives. At the end of their lifecycle, they get recycled and remanufactured into new pallets.

Build for Automation

Because plastic pallets are molded, the sizes and weight are always consistent, causing zero disturbances in your automated material handling systems.

* **Static:** resistance to pressure on a flat ground surface and evenly distributed load at 20°C
Dynamic: on a forklift with an evenly distributed load at 20°C
In rack: evenly distributed load along the longitudinal sides, resting on two supports for over 100h at 20°C
